

# Guess My Rule: The Function Machine Game

## Materials (per partners):

- Guess My Rule card deck (Copy decks onto different color card stock, if possible)
- Function Machine template in sleeve protector
- Dry-erase pen and eraser

## Directions:

- Partner A shuffles the card deck and turns over the first card without showing it to Partner B.
- Partner B uses the Function Machine template and records an “in” number.
- Partner A uses this number in the rule from the card. Partner A announces the “out” number.
- Partner B writes the number in the “out” column on the Function Machine template.
- Partner B records a different “in” number on the Function Machine template.
- Partner A again uses this number in the rule and announces the “out” number.
- Player B records the “out” number in the appropriate place on the Function Machine in/out table.
- Player B may guess the rule at any time by writing the rule in the rule space on the function machine and saying it aloud.
- If Player B’s rule is correct, he/she scores one point for each number in the “in” column (e.g. one point for each guess).
- If Player B’s rule is not correct, he/she writes down another “in” number and play continues until Player B identifies the correct rule.
- Players switch positions. Player B draws a card and Player A must now use the Function Machine Template to record “in” and “out” numbers.
- The game consists of 3-5 rounds. Player with the **lowest** score wins since this is the player who guessed the rule with the fewest clues.

## Differentiation:

- Use different decks to best match ability levels (e.g. only addition and subtraction for a basic game or two-rules cards for enrichment)
